Bilateral Meetings

- Monday 14:30 - 17:00

Description

We are developing new heavy metal analysis technique for water samples in Department of Applied Physics of University of Eastern Finland. The aim is to be capable to perform real-time and on-site measurements with sensitivity high enough for monitoring current environmental regulations.

Organization Type

Research Institute

Email

tuomo.nissinen@uef.fi

Country

Finland

City

Kuopio, Yliopistonranta 1 [Google map](#)

Areas of Activities

Adsorbents and chemicals

Research, development and innovation

Environmental and process monitoring
